

*"Speed, Flexibility, Dependable Performance"*

# STB-145SS

## Orbital Servo Side Seal

- Servo controlled
- Space Saving
- Easy-to-operate
- Low maintenance
- Saves film

The new e145SS is Texwrap's latest design advance for applications requiring the high speed wrapping of packages where a side seal is desired.

The e145SS retains all the hallmarks of design and proven reliability that the market has come to expect from Texwrap - all in a brand new compact size. The Texwrap patented servo orbital head combined with the 200 feet per minute conveyor speed make it the fastest wrapper of its kind.

Simplicity and ease-of-use were paramount in the e145SS design. The controls are easily accessible and intuitive to use. When combined with the color touchscreen controls on the swivel panel, the easy access sliding doors, and the easy-mount-easy-thread film carriage, this machine gives new meaning to the term "operator-friendly".

The design of the e145SS will appeal equally to the maintenance department. We eliminated any requirement for shop air by substituting servo drives and we provided easy access to the wrapping area by allowing the sliding operator doors to lift out completely.

From true Generation 3 servo design to solid 24/7 construction, the Texwrap e145SS provides maximum reliability, ease of use, and minimum maintenance requirements resulting in the lowest total cost of ownership available on the market today.
